Managed Services - Remote Hands

Managed services offer a host of support functions to help organizations improve their performance on the cloud. The Remote Hands service Provides the assistance of a team of highly trained, in-house, certified technicians that are available 24x7x365 and can monitor servers remotely through a single pane of glass known as UnityOneCloud.

Managed Services also helps with Inventory Audit. We create a library of information about the equipment, rack installation, cabling, and wiring of cross-connect termination solutions, shipping, and receiving for equipment/inventorying boxes of the data center.

Inventory Audit

Inventory Audit can help conduct comprehensive cage and cabinet audits by creating a library of information about the equipment and their installation in the data center, including servers, cabinets, and storage devices. We also provide installation services in addition to a robust monitoring system.
Rack Installation

Rack Installation provides highly trained and experienced rack installers for racking and stacking of data center equipment.

Cabling and Wiring

Remote Hands offers cabling and wiring in global data centers, including cross-connect termination solutions and moving, securing, or dressing existing data center cables.

Shipping and Receiving

We provide receiving and shipping services for the data center equipment/inventory boxes, ensuring customer equipment or packages are secure.
